

**SEAT ANCHORAGE MACHINE**

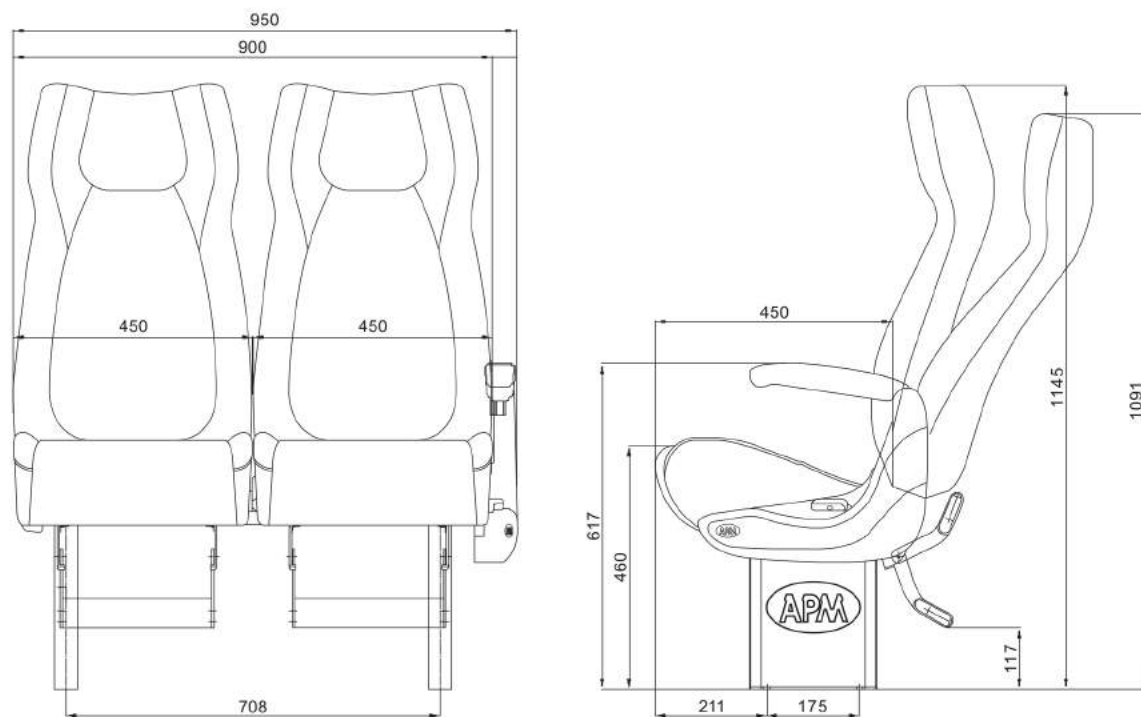

**INGRESS EGRESS MACHINE**

At APM, our seats are tenaciously tested to well over 70 forms of international automotive quality and safety standards requirements. As an OEM components manufacturer, APM have its own product test center with facilities to test its products to all known quality and safety requirements.

- Computerized 6-axis seat and seat belt anchorage testing machine is capable to carry out test on seat structural tensile, and safety belt anchorage strength.
- Robotic ingress and egress machine that simulates the motion of getting in and out of the seat to evaluate wear and tear conditions on trim materials and seat structure integrity.
